

# Contents

<b>Preface</b> .....	<b>xi</b>
<b>About the Author</b> .....	<b>xiii</b>
<b>Chapter 1 Aluminum Casting Applications</b> .....	<b>1</b>
<b>1.1 Introduction</b> .....	<b>1</b>
<b>1.2 Aluminum Casting Advantages and Applications</b> .....	<b>2</b>
<b>1.3 Aluminum Casting Limitations</b> .....	<b>2</b>
<b>1.4 Aluminum Castings Market Growth</b> .....	<b>2</b>
<b>1.5 Aluminum Conversions from Steel and Iron</b> .....	<b>6</b>
<b>Chapter 2 Engineering Component Configuration</b> .....	<b>9</b>
<b>2.1 Design Development Disciplines and Interactions</b> .....	<b>9</b>
<b>2.2 Engineering of Component Design</b> .....	<b>10</b>
<b>2.3 Design and Process Validation and Production Release</b> ..	<b>17</b>
<b>2.4 Matrix of Design and Manufacturing Elements</b> .....	<b>19</b>
<b>Chapter 3 Casting Process Options</b> .....	<b>21</b>
<b>3.1 Range of Aluminum Casting Processes</b> .....	<b>21</b>
<b>3.2 Process Cooling Rate and Microstructure</b> .....	<b>22</b>
<b>3.3 Why Sand Castings Work in Certain Applications</b> .....	<b>24</b>
<b>Chapter 4 Overview of Casting Processes</b> .....	<b>29</b>
<b>4.1 Green Sand Casting Process</b> .....	<b>29</b>
<b>4.2 Air Set or No-Bake Molding Process</b> .....	<b>30</b>
<b>4.3 Vacuum Molding Process</b> .....	<b>33</b>
<b>4.4 Evaporative Foam Casting Process</b> .....	<b>35</b>
<b>4.5 Die Casting Process</b> .....	<b>37</b>
<b>4.6 Gravity Permanent Mold Process</b> .....	<b>42</b>
4.6.1 High-Quality Castings Capability.....	42
4.6.2 Melt Treatment for Fine Microstructures .....	43
4.6.3 Metal Handling to Avoid Inclusions.....	46
4.6.4 High-Volume GPM Manufacturing Cell.....	49
4.6.5 Solidification and Feeding to Prevent Shrink Porosity ..	50
4.6.6 Semipermanent Molding.....	54
<b>4.7 Low-Pressure Permanent Molding Process</b> .....	<b>55</b>
4.7.1 Directional Solidification.....	56
4.7.2 Importance of Pressurization .....	57

4.7.3 Oxide Prevention .....	58
4.7.4 Low-Pressure Permanent Molding Cell Layout .....	61
4.7.5 Low-Pressure Permanent Molding Advantages.....	61
4.7.6 Use of Vacuum in Low-Pressure Permanent Molding .	62
<b>4.8 Counter Pressure Process.....</b>	<b>62</b>
<b>4.9 Squeeze Casting Process .....</b>	<b>64</b>
<b>4.10 Investment Casting .....</b>	<b>68</b>
<b>4.11 Rapid Prototype Casting Processes .....</b>	<b>71</b>
4.11.2 Rapid Prototyping System.....	74
4.11.3 3D Printing or Additive or Layered Manufacturing.....	74
4.11.4 Rapid Sand Casting Process .....	77
4.11.5 Rapid Die Casting Process .....	78
<b>4.12 Cast Forge Hybrid Process .....</b>	<b>79</b>
4.12.1 Cast-Forge Process.....	80
<b>4.13 Semisolid Metal Processes .....</b>	<b>82</b>
4.13.1 Semisolid Metal.....	82
4.13.2 Thixoforming.....	83
4.13.3 The Slurry-on-Demand Process .....	86
4.13.4 Future Opportunities for Semisolid Metal.....	88
4.13.5 Further Research .....	89
<b>Chapter 5 Alloys and Heat Treatment Choices .....</b>	<b>91</b>
<b>5.1 Cast Alloy Designations .....</b>	<b>91</b>
<b>5.2 Alloying Elements and Alloy Characteristics.....</b>	<b>91</b>
<b>5.3 Alloys for Gravity and Low-Pressure Permanent Molds,     Squeeze and Die Casting.....</b>	<b>95</b>
<b>5.4 Typical Tensile Properties of Permanent Molded     Castings.....</b>	<b>96</b>
<b>5.5 Alloys for Die Castings.....</b>	<b>97</b>
<b>5.6 Typical Tensile Properties of Die Castings .....</b>	<b>97</b>
<b>5.7 Heat Treatment Designations .....</b>	<b>97</b>
<b>5.8 Typical Heat Treatment Cycles for Permanent Molded     Castings.....</b>	<b>98</b>
<b>5.9 Product Functional Needs and Alloy Choices of     Sand and Permanent Mold Castings .....</b>	<b>98</b>
<b>5.10 Product Functional Needs of Die Castings and     Alloy Choices .....</b>	<b>98</b>
<b>5.11 Alloys for High-Vacuum Die Cast Structural Castings ....</b>	<b>98</b>
<b>5.12 Examples of Micrographs .....</b>	<b>100</b>
<b>Chapter 6 Engineering Die Castings.....</b>	<b>103</b>
<b>6.1 Engineering Product Design .....</b>	<b>103</b>
6.1.1 Parting Plane.....	103
6.1.2 Part Orientation .....	106
6.1.3 Drafts for Aluminum Die Castings .....	110

6.1.4	Shrink Factors and Linear Tolerances.....	110
6.1.5	Flatness Tolerances.....	110
6.1.6	Machine Stock.....	111
6.1.7	Slides, Pull-backs, or Moving Cores .....	111
6.1.8	Locators and Clamping Pads.....	111
6.1.9	Ejection Systems and Ejection Pads .....	113
6.1.10	Gate Pads.....	113
6.1.11	Design for Trimming.....	114
<b>6.2</b>	<b>Process Engineering .....</b>	<b>115</b>
6.2.1	Die Casting Process Elements and Cycle Times .....	115
6.2.2	Die Thermal Cycling and the Cooling Balance .....	117
6.2.3	Machine Hydraulic System .....	119
6.2.4	Shot Profiles and Significance of Plunger Velocities..	121
6.2.5	Significance of Fraction Solid or Solid Fraction.....	122
6.2.6	Importance of Atomization.....	125
6.2.7	Heat Transfer Coefficient.....	126
6.2.8	Explanation of Die and Gate Temperatures.....	128
6.2.9	Metal Flow Analysis.....	128
6.2.10	Division of Casting into Segments .....	130
6.2.11	Gating Design Guidelines.....	130
6.2.12	Gating Design Steps.....	134
6.2.13	Check for Machine Capability— $PQ^2$ Diagram .....	134
6.2.14	Design of Runners .....	137
6.2.15	Design of Overflows and Vents.....	138
6.2.16	Freeze Blocks.....	140
6.2.17	Computer Simulation for Flow Validation, Overflow and Vent Placement.....	140
6.2.18	Vacuum Die Castings and High-Vacuum Structural Die Castings.....	141
6.2.19	Local Squeeze Application .....	145
6.2.20	Quality Problem Solving.....	147
<b>Chapter 7</b>	<b>Engineering of Gravity Permanent Mold Castings.....</b>	<b>151</b>
<b>7.1</b>	<b>Geometric Factors of Gravity Permanent Molding.....</b>	<b>152</b>
7.1.1	Parting Plane and Part Orientation.....	152
7.1.2	Guidelines for Parting Plane and Part Orientation....	153
7.1.3	Drafts.....	155
7.1.4	Shrink Factors or Mold Maker's Shrink Rule .....	156
7.1.5	Dimensional Tolerances .....	156
7.1.6	Locators and Clamping Pads.....	157
7.1.7	Gates and Feeder Pads .....	158
<b>7.2</b>	<b>Process and Manufactureing Elements of Gravity Permanent Molding .....</b>	<b>160</b>
7.2.1	Mold Materials and Special Inserts .....	160
7.2.2	Mold Mass, Shape, and Thickness.....	163

7.2.3	Mold Alignment .....	165
7.2.4	Ejection System and Mold Venting.....	166
7.2.5	Quick-Change Systems for Metal Cores (Pull-Backs) .	167
7.2.6	Quick-Change Practice for Preheated Molds .....	169
<b>7.3</b>	<b>Mold Coatings .....</b>	<b>170</b>
7.3.1	Mold Coating Materials .....	171
7.3.2	Coating Application Guidelines.....	172
7.3.3	Coating Thickness Control .....	172
7.3.4	Cross-Hatching and Baring Out.....	173
7.3.5	Mold Coating Maps .....	174
7.3.6	Mold Preparation Area Layout.....	174
<b>7.4</b>	<b>Engineering of Cores and Core Boxes.....</b>	<b>174</b>
7.4.1	Core Box Materials .....	174
7.4.2	Core Box Parting and Core Ejection .....	175
7.4.3	Core Prints.....	176
7.4.4	Core Blowing and Venting .....	178
7.4.5	Core Carriers.....	179
7.4.6	Core Mudding and Assembly .....	179
7.4.7	Core-Setting Fixtures and Guide Pins .....	179
7.4.8	Automated Core-Setting and Auto Blow-Off.....	179
7.4.9	Safety with Robotic Core-Setting.....	180
<b>7.5</b>	<b>Gravity Permanent Mold Gating and Feeding Principles .....</b>	<b>181</b>
7.5.1	Feed Driven Castings .....	183
7.5.2	Fill Driven Castings.....	199
<b>7.6</b>	<b>Pouring Systems.....</b>	<b>201</b>
7.6.1	Importance of Pouring Volume Control.....	201
7.6.2	Automated Pouring Systems.....	202
7.6.3	Pouring Cup Shape and Materials.....	202
7.6.4	Oxide Entrainment, Filtration, and Skimmers.....	203
7.6.5	Pouring Cup Foil Removal .....	205
<b>7.7</b>	<b>Mold Cooling and Control .....</b>	<b>205</b>
7.7.1	Central Closed-Loop Water System .....	205
7.7.2	Mold Cooling Schedule and Documentation.....	206
<b>7.8</b>	<b>De-Coring and De-Gating.....</b>	<b>208</b>
<b>7.9</b>	<b>Casting Design for Heat Treatments .....</b>	<b>209</b>
<b>7.10</b>	<b>Cycle Time Planning and Analysis .....</b>	<b>211</b>
7.10.1	Tipper Cycle Planning.....	211
7.10.2	Table Cycle Planning.....	212
<b>Chapter 8</b>	<b>Engineering of Low-Pressure Permanent Mold Castings.....</b>	<b>215</b>
<b>8.1</b>	<b>Engineering of Wheels .....</b>	<b>215</b>
8.1.1	Technical Requirements of Wheels.....	216
8.1.2	Tooling Highlights .....	216
8.1.3	Design for Directional Solidification .....	217

8.1.4 Multiple Sprues for Larger Wheels .....	221
8.1.5 Feeding and Solidification Analysis .....	221
8.1.6 Pressure Ramps.....	226
8.1.7 Heat Treatment, Stacking, Aging and Curing .....	229
8.1.8 Wheel Testing and Validation .....	232
<b>8.2 Engineering of Feed-Driven Structural Castings .....</b>	<b>232</b>
8.2.1 Critical Safety Suspension Castings .....	232
8.2.2 Front Knuckles .....	232
8.2.3 Front Lower Control Arms.....	235
8.2.4 Rear Lower Control Arms .....	236
8.2.5 Sand-Cored Suspension Castings .....	238
<b>8.3 Fill-Driven Chassis Castings .....</b>	<b>241</b>
8.3.1 Cored Lower Control Arms.....	241
8.3.2 Cored and Non-Cored Cradles and Cross Members .....	242
8.3.3 Gating Systems.....	242
8.3.4 Distortion, Straightening and Heat Treatment.....	244
<b>Chapter 9 Process Selection Guidelines .....</b>	<b>247</b>
9.1 Markets, Products, Processes and Alloys.....	247
9.2 Product Function and Performance Factors .....	247
9.2.1 Geometric Factors .....	249
9.2.2 Mechanical Properties .....	250
9.2.3 Tooling Cost.....	250
9.2.4 Overall Costs .....	251
9.3 General Guide for Process Selection .....	251
<b>Chapter 10 Product Launch Process .....</b>	<b>253</b>
10.1 Development Phases and Critical Elements .....	253
10.2 Product-Process Flow Diagram .....	255
10.3 Process Failure Mode and Effects Analysis .....	255
10.4 Engineering Specifications — Example .....	261
10.4.1 Example: Product — Suspension Front Knuckle .....	261
10.4.2 Test Procedures and Requirements .....	262
10.5 Change Control and Revalidation Requirements .....	266
10.6 Instructions and Definitions .....	266
10.7 Process Control Plan or Manufacturing Plan .....	267
10.7.1 Purpose of Control Plan .....	267
10.8 Program Launch Manual .....	268
<b>Index .....</b>	<b>275</b>
