Preface	vii	5.6 Design Validation and Product Testing	60
About the Author	viii	5.7 Product Marking for Traceability	61
Chapter 1 Casting Performance and Cost Drivers	1	Chapter 6 Engineering for Manufacturability and Integrity ...	63
Chapter 2 Overview of Iron and Steel Manufacturing	3	6.1 Locator Systems	63
2.1 Iron and Steel Manufacturing Process	3	6.2 Design for Handling, Assembly, and Servicing	64
2.2 Overview of Cast Iron Manufacturing	6	6.3 Guidelines for Parting Plane Selection and Pouring Orientation	65
2.3 Steel Production	7	6.4 Design Concepts to Eliminate Cores, Core Support, Venting, and Core Cleaning	70
Chapter 3 Overview of Molding and Core Making	11	6.5 Use of Chaplets	73
3.1 Classification of Molding and Core-Making Systems	11	6.6 Use of Chills in Cast Iron Castings	73
3.2 Shell Molding	16	6.7 Minimum Wall Thickness Guidelines	74
3.3 Special Casting Processes	18	6.8 Guidelines for Drafts, Machine Stock, Tolerances, and Contraction or Shrink Rule	75
3.4 Core-Making Processes	20	6.9 Guidelines for Wall Junctions, Bosses, Lugs, and Windows	83
3.5 Overview of Casting Manufacturing	23	6.10 Hot Tearing, Cracking, Internal Stresses, and Distortion	89
3.6 Casting Facility Layout Concepts	23	6.11 Design and Process Engineering Highlights	95
Chapter 4 Influence of Microstructure on Mechanical Properties and Performance	31	6.12 Pattern Layouts and Nesting Guidelines	99
4.1 Classification of Steels and Cast Irons	31	Chapter 7 Engineering of Gray Iron Castings	103
4.2 Crystal Structure	31	7.1 Material Standards	103
4.3 Iron-Iron Carbide Equilibrium Diagram	32	7.2 Stress Relieving	105
4.4 Microconstituents or Phases in Iron-Iron Carbide Phase Diagram	32	7.3 Gating Systems and Design Guidelines	106
4.5 Iron-Carbon Carbide-Silicon Equilibrium Diagram of Cast Irons	32	7.4 Pouring Rate and Pouring Time	115
4.6 Inoculation Benefits	34	7.5 Technology of Unalloyed or Low-Alloyed Gray Iron Castings	123
4.7 Flake Graphite Types and Typical Applications ..	35	7.6 Technology of White Iron and High-Alloyed Cast Irons	138
4.8 Base Elements and Influence on Microstructure ..	36	7.7 Casting Defects and Problem-Solving	147
4.9 Alloying Elements and Microstructure Influences	37	Chapter 8 Engineering of Malleable Iron Castings	157
4.10 Graphitization, Cooling Rates, and Heat Treatment Effects	37	8.1 Advantages and Limitations	157
4.11 Evolution of Cast Iron Types	40	8.2 Malleabilization Process	157
4.12 ASTM Specification A247 for Graphite Shapes	40	8.3 Mechanical Properties	158
4.13 Component Characteristics and Related Metal Properties	41	8.4 Manufacturing Guidelines for Malleable Iron Castings	158
4.14 Choice of Alloy	41	Chapter 9 Engineering Ductile Iron Castings	163
4.15 Typical Material Choices for Various Applications	45	9.1 Influence of Graphite Morphology and Matrix	163
4.16 Selection of the Best Molding Process	47	9.2 Advantages of Ductile Iron	163
Chapter 5 Engineering for Functional Performance	49	9.3 Typical Applications of Ductile Iron	164
5.1 Component Development Disciplines and Interactions	49	9.4 Ductile Iron Grades, Chemistry, Matrix, and Mechanical Properties	164
5.2 Design and Casting Engineer's Interaction in Product Development	49	9.5 Ductile Iron Treatment Methods and Controls	168
5.3 Safety in Design	50	9.6 Gating and Feeder Design Guidelines	173
5.4 Engineering for Function	51	9.7 Technology of Ductile Iron Castings	185
5.5 Product Design Development Overview	59	9.8 Ductile Iron Casting Defects and Problem Resolution	191

Chapter 10 Engineering Austempered Ductile Iron Castings . . .	195
10.1 Austemperability Requirements	195
10.2 Austempering Stages and Microstructures	196
10.3 Mechanical Properties	198
10.4 Advantages and Limitations of ADI	200
10.5 Machinability of ADI and Growth During Austempering	200
10.6 Austempering Systems	201
10.7 ADI Process Variants	201
10.8 ADI Applications	202
10.9 Guidelines for Targeting ADI Applications	205
Chapter 11 Engineering Compacted Graphite Iron Castings . . .	207
11.1 Compacted Graphite Iron Advantages Over Gray Iron and Ductile Iron	208
11.2 Thermal Fatigue Resistance	209
11.3 Optimum Carbon and Silicon Ranges for Compacted Graphite Iron	210
11.4 Mechanical Property Standards	210
11.5 Critical Factors that Control Compacted Graphite Iron	210
11.6 Methods of Compacted Graphite Iron Manufacturing	211
Chapter 12 Engineering Carbon and Alloy Steel Castings	217
12.1 Microconstituents of Low- and Medium-Carbon Steel	217
12.2 Other Phases—Bainite and Martensite	219
12.3 Effect of Alloying Elements on Steel	219
12.4 Steel Casting Applications Overview	219
12.5 Engineering Guidelines	224
12.6 Guidelines for Feeder Design	239
12.7 Feeding Aids	257
12.8 Gating System Design	265
12.9 Alloys, Properties, Applications, and Engineering Details	272
12.10 Steel Casting Defects and Examples of Problems Solved	296
Chapter 13 Applications of Iron and Steel Castings and the Impact of Electric Vehicles	305
13.1 Iron and Steel Castings Versatility	305
13.2 Impact of Electric Vehicles on the Future of the Iron and Steel Castings Industry	308
Chapter 14 Process Control, Product Quality, and Product Launch Process	323
14.1 Process Control Tools and Techniques	323
14.2 Incoming Material Control	323
14.3 Process Control of Sand Preparation and System Maintenance	324
14.4 Metallic Charge Materials	328
14.5 Melting, Metallurgical, and Mechanical Testing	329
14.6 Product Quality Control	332
14.7 Product Launch Process	334
Index	341
