Preface	ix
CHAPTER 1	
Introduction to Fatigue and Fracture	1
Industrial Significance of Fatigue	1
The Brittle Fracture Problem	4
Changes in Design Philosophy	8
Life-Limiting Factors	17
CHAPTER 2	
Mechanical Behavior	25
Tensile Properties	25
Resilience and Toughness	33
True Stress-Strain Curve	34
Stress Concentrations	38
Notched Tensile Test	39
Compression	41
Shear and Torsion	44
Stress-Strain Relationships	45
Combined Stresses	46
Yield Criteria	46
Residual Stresses	48
Hardness	51
CHAPTER 3	
Ductile and Brittle Fracture	55
Ductile Fracture	56
Brittle Fracture	74
Macroscopic Ductile and Brittle Fracture Surfaces	86

Ductile-to-Brittle Transition in Steels	90
Intergranular Failures	92
Causes of Steel Embrittlement	96
Combined Fracture Modes	98
CHAPTER 4	
Fracture Mechanics	101
Griffith's Theory of Brittle Fracture	101
Linear Elastic Fracture Mechanics	104
Elastic-Plastic Fracture Mechanics	113
Charpy and Izod Impact Testing	119
Drop-Weight Testing	124
Fracture Toughness Testing	129
Variables Affecting Fracture Toughness	140
CHAPTER 5	
Fatigue of Metals	147
Stress Cycles	147
High-Cycle Fatigue	150
Low-Cycle Fatigue	157
Fatigue-Life Prediction	160
Cumulative Damage	169
Fatigue Crack Nucleation and Growth	170
Fracture Mechanics Approach to Fatigue Crack Propagation	181
Crack Closure	189
The Short Crack Problem	189
Geometrical Stress Concentrations	192
Manufacturing Stress Concentrations	194
Fatigue-Life Improvement	199
Fatigue Design Methodologies	202
CHAPTER 6	
Fatigue and Fracture of Engineering Alloys	209
Fracture Toughness of Steels	209
Fatigue of Steels	218
Fracture Toughness of Aluminum Alloys	228
Fatigue of Aluminum Alloys	233
Fracture Toughness of Titanium Alloys	240
Fatigue of Titanium Alloys	245
CHAPTER 7	
Metallic Joints—Mechanically Fastened and Welded	263
Mechanically Fastened Joints	263
Threaded Fasteners in Tension	265

Bolts and Rivets in Bearing and Shear	275
Fatigue in Welded Joints	282
Methods for Improving the Fatigue Life of Welded Joints	291
Fracture Control in Welded Structures.	293
Factors Affecting Fracture Toughness	295
CHAPTER 8	
Fracture Control and Damage Tolerance Analysis	303
Principles of Fracture Control	304
Concepts of Damage Tolerance Analysis.	307
Fracture Control Measures.	308
Fracture Control Plans	318
Damage Tolerance Requirements	320
Fracture Mechanics and Fatigue Design	323
CHAPTER 9	
Fatigue and Fracture of Ceramics and Polymers	327
Ceramics	327
Toughening Ceramics	330
Ceramic Fracture	332
Fatigue and Subcritical Crack Growth.	336
Polymers	337
Polymer Fatigue.	353
Impact Strength and Fracture Toughness.	359
Stress Rupture	364
Fractography	366
Environmental Performance of Plastics.	366
CHAPTER 10	
Fatigue and Fracture of Continuous-Fiber Polymer-Matrix	
Composites	377
Laminates.	380
Composites versus Metallics	382
Advantages and Disadvantages of Composite Materials.	384
Fatigue Behavior	391
Delaminations and Impact Resistance	396
Damage Tolerance Considerations.	401
Effects of Defects.	404
Building-Block Approach	410
CHAPTER 11	
High-Temperature Failures	415
The Creep Curve	416
Stress-Rupture Testing	424
Creep Deformation Mechanisms	426

Elevated-Temperature Fracture	428
Metallurgical Instabilities	434
Environmental Effects	440
Creep-Life Prediction.	443
Design against Creep	444
High-Temperature Fatigue.	447
CHAPTER 12	
Wear Failures	461
Abrasive Wear	462
Erosive Wear	467
Erosion-Corrosion	469
Grinding Wear	472
Gouging Wear	474
Adhesive Wear.	475
Fretting Wear	479
Contact-Stress Fatigue	481
CHAPTER 13	
Environmentally-Induced Failures.	501
Basics of Electrochemical Corrosion.	501
Forms of Corrosion	507
Stress-Corrosion Cracking.	521
Hydrogen Damage.	532
Corrosion Fatigue.	535
Corrosion Prevention	541
High-Temperature Oxidation and Corrosion	544
CHAPTER 14	
The Failure Analysis Process	549
Collection of Background Data and Samples	550
Collecting Data and Samples.	550
Preliminary Examination	555
Nondestructive Examination	556
Fracture Origin.	559
Selection and Preservation of Fracture Surfaces	561
Macroscopic Examination of Fracture Surfaces	564
Microscopic Examination of Fracture Surfaces.	567
Stress Analysis.	567
Fracture Modes	568
Fracture Mechanics Applied to Failure Analysis.	572
Metallographic Examination	573
Mechanical Testing	575

Chemical Analysis	579
Simulated Service Testing	581
A Final Word	582
APPENDIX A	
Defects Leading to Failure.	585
Design Deficiencies	585
Material and Manufacturing Defects	588
Ingot-Related Defects	588
Forging Imperfections	592
Sheet Forming Imperfections.	596
Casting Defects	597
Heat Treating Defects	603
Weld Discontinuities	616
Service-Life Anomalies	624
Materials Selection for Failure Prevention	627
Index	633
